Sc.), Diploma in Technology (Mechanical, Mining and Computer Science),BCA, BA(Hons.) in Journalism and Mass Communication, B.Com (Hons.), BBA, MCA, MBA, MBA (Working Professionals) and Ph.D in Management.

ABOUT THE SEMINAR:

The theme of the seminar is **“Cyber Security: Emerging Trends”**. In the last few years, Cyber Security has been emerging as the biggest threat for individuals, business, industry and Government. There are many cyber threats like cyber terrorism, cyber warfare, and cyber espionage. They target strategic political, military, or infrastructural assets of a nation, or its people. The World is starting to understand that malware and others that are publicly available, makes easy for anyone to become a cyber attacker. Killchains, zeroday attacks, ransom ware, alert fatigue and budgetary constraints are just a few of the challenges that cyber security professionals face. The increased complexity of the communication and networking infrastructure is making the prevention of cyber crimes difficult, thereby increasing the demand for new approaches to cyber security. At the same time, demand for qualified Cyber Security professionals is increasing many folds. The worldwide spend for Cyber security continues to grow and expected to reach \$101 billion by 2018. In view of this, IT professionals as well as

Business Managers, Academicians and Researchers need a stronger understanding of these topics and many others, to be able to confront those challenges more effectively.

Tracks: The seminar will have inauguration (which includes Key Note Speech), Paper Presentations in following tracks and Valedictory (which will include a panel discussion)

- ♦ Technology (for prevention and mitigation)
- ♦ Industry Track (Banking, Financial Services, Telecom, Govt. etc)
