**What will you learn in this course?**

You will learn – The process of making 3D models

- **Meaning** – Meaning of 3D object and definition of 3D Modelling
- **Tools** – the different types of tools and commands used in 3D modelling
- **Applications** – The various applications of 3D Modelling software in various industries.
- **Future scopes** – The future scopes in this 3D modelling sector.
- **Job opportunities** – what are the various types of jobs available in various industries.
- **Drawings.** How drawing is important to all engineering disciplines.....
