## IUJ Alumni Memoirs

### *A Golden Era*

My most nostalgic moment, started just after the entry as I was able to gel with my friends easily, who became my lifelong friends. The faculties at the Institute were elite and I was overwhelmed attending their lectures. As I enrolled late, my biggest challenge was to cover-up the missing sessions. However, I went to some faculties to ask for personal classes and I got tremendous support from them.

I learned from my faculties that challenges make a person stronger. I was facing many challenges in my tenure as a student but thanks to my teacher who always motivated and inspired me by saying that 'Life is a journey and it never stops; so go with it sometimes running sometimes walking but always keep moving. So I set a goal and chase it and followed it till I reached my destination. I adhered to myself and faced everything with a brave heart. I boosted my self-confidence which helped me finally to be what I always wanted to be.

The thought of entrepreneurship was always there in my mind. And finally, the day came when I planned to start my own venture. The guidance of my teachers helped me to achieve my career goals and to confidently face the cut-throat competition of the market. Life goes on and we make memories day by day but these were some short and best nostalgic memories I had.
