

Painting Competition Theme On COVID-19

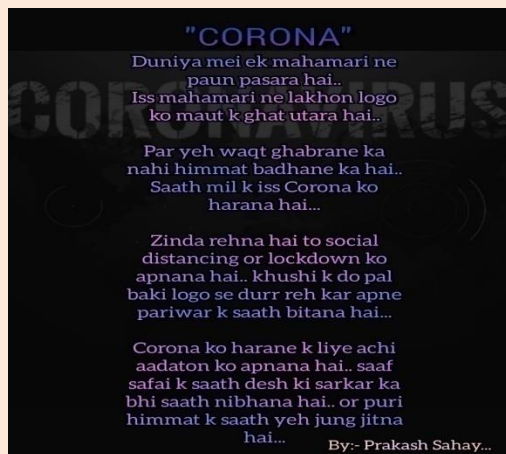

Poems and Articles by IUJ Students

It's a fear, It's a rumor,
Which prevails everywhere,
It's a death, It's a breath,
Which stops in every minutes,
It arises after a decade and already
taken many lives,
So it is a time to beat,
So be aware, be preventive and be safe
from corona

Manisha Pandey

Excess of anything is bad

Every coin has its two side. Same as the case with corona virus which has been termed as an epidemic is also having two side. One side of it is horrifying and at the same time terrifying us. It has killed thousands of people and lakhs of people get infected around the world. Many people are away from their home & are unable to meet their family. Crops, vegetables & fruits have been ripped but there is no one to harvest it. It has also affected the economy adversely.

On the other side our nature which was dying due to pollution have started taking fresh breath. Many animals returned to their natural habitat. Global warming ratio of whole world has reduced due to lock down. Factories have been shutdown, vehicles are not moving on the road due to which air pollution have gone down. We people in search of our comfort and luxurious life have cut down trees, synchronized the forest in a small space & diverted the flows of rivers for making buildings and factories without thinking that we are harming nature & what will be its impact on our environment. Due to this many beautiful creatures and plants have extinct from the world and are now just remained in pictures and stories.

For prevention & not to get infected from corona virus we are using oxygen/ medicated mask & sanitizers so that we could stay safe & healthy. But by seeing both side pros & cons I think our earth is also using the mask of corona virus to prevent itself from us who are doing pollution and harming the nature in whatever ways we can.

SO, ITS HIGH TIME TO THINK AND TO SAVE THE EARTH AND NOT TO HARM THE NATURE. SO THAT OUR EARTH DOES NOT NEED SUCH MASK TO BREATHE FRESH AIR. AS WE DON'T LIKE CARRYING MASK, I AM SURE OUR EARTH ALSO MUST NOT BE HAPPY BY USING THIS MASK WHICH IS DANGEROUS FOR HUMANS LIFE.

MBA II

I travel everywhere.

I spread like air,

Without any care.

Save your life if you can,

It's your choice to be a man.

Keep distance with your friend,

To make healthy and safe environment.

Follow all the cleaning rules,

To be happy with many other clues.

Don't be smart to make other fool,

Don't act ridiculous which make you fool.

So, stop ignoring me,

I can destroy you like a meme.....!

Go Corona, Go Corona

Go Corona, Go Corona, we urge for your mercy

Please spare us from your ungrateful treachery

You have sucked the blood of many, like a wild snake

To arrest you, our government, had much effort it did take!

You currish serpent, who is adamant and selfish

Your bloodthirsty jaws of a lion will be chained for sure!

Your birthplace was Wuhan, and you reproduced everywhere

Freedom from your rule is what we currently wish

You have become a rapid-evolving situation!

To stop you, we will try our best to find a solution

Beware, virus, you may be a king or a serpent

But we shall never be treated as your servants!

You have been an awareness in and around social media

IMPOSSIBLE is for those who do not try

We will definitely not let you win.

BBA-LL.B IV (Faculty Of Law)

नाम है मेरा कोरोना,
छुपा नहीं मुझसे कोई कोना,
बचकर रहना मुझसे तुम,
वर्ना तुम्हें पड़ेगा रोना।
हाथ मिलाना छोड़ो अब तुम,
हाथ जोड़ना सीखो।
घर में ही ठहरो अब तुम,
कुछ नया इतिहास लिखो।
आस पास को रखो साफ,
वर्ना मैं नहीं करूँगा तुम्हें माफ।
आएगी जब तुम तक बात,
स्वच्छ रहकर मुझे देना मात।
मुझसे बचना है जरूरी,
तो आपस में बनाए रखो दूरी।
ये बन चुकी है सबकी मजबूरी,
चाहे तुम्हारी, हो या ना हो मंजूरी।
घर से निकलो तो पहनो मास्क,
समय समय पर धोओ हाथ।
मुझसे बचना चाहो तो,
देना होगा एक दूजे का साथ।
सरकार की हर बात को मान लो, **look**
घर से न निकलने की ठान लो।
वर्ना नहीं बचोगे मुझसे तुम, ये जान लो।
