## The ICFAI Group

### Pioneering professional education for over 35 years

ICFAI was established in 1984 as a not-for-profit society with the broad objective of empowering citizens through world class quality education. The Institute announced its arrival into the Indian education fora by launching a high end, innovative professional program in financial analysis in 1985. The Program was first-of-its-kind in India, aimed at equipping students and working professionals with cutting-edge knowledge in contemporary areas of finance. Since its establishment, ICFAI Group has made a significant mark in the Indian educational field with a pan-Indian network and presence.

Innovation has been the mainstay of ICFAI Group with innovation prevalent in its programs and even its culture. Subsequently, there was a big leap when ICFAI Group started its chain of business schools (IBS) across India in 1995 to offer management program. Since its inception, IBS has been consistently ranked among the top ranked B-Schools of India providing excellent academic delivery and infrastructure to its students and transforming them into leaders for the future.

Another example that is a testimony to the culture of innovation is the introduction of Case Study methodology at IBS. The Case Research Center at IBS has become a center of excellence and has won several accolades across the world.

ICFAI Group has 2 Strategic Institutional Units, the ICFAI Universities and the ICFAI Business Schools. In all the programs offered across these units, the emphasis is on adherence to academic rigor and differentiated curriculum that bridges the industry-academia gap.

ICFAI Group focuses on learning rather than instruction. In addition, the institute is engaged in important areas of research covering environmental sustainability, agricultural economics, health policy, financial economics, banking, intellectual property rights etc. There have been path-breaking research and good quality publications in these areas.

Flexible and tech enabled learning also plays an important role in ICFAI's teaching methodology. The delivery takes place with the use of hi-tech learning management system at campus programs and content delivery for distance learning through online medium.

ICFAI Group practices the value of academic integrity at all levels. As a policy, admissions are purely based on merit and there is nothing like capitation fee et al. The fee payable is published in the application material and that remains unchanged.

The ICFAI Group's culture of teaching and learning supports and fosters intellectual and personality development among its graduating students. They carry an attitude of ownership of their work. ICFAI Group strives to make the students - DOERS. The programs are designed such that the students & professionals graduating from the institution have the ability to take risks, make decisions and own the work. ICFAI Group system, strongly believes in developing an 'entrepreneurial mindset' among its graduating students.

At ICFAI, students inculcate research and analytical orientation due to its institutional strength and support for the research and development activities. Holistically, the student undergoes a transformative change.

The alumni of ICFAI Group are working in renowned companies world-wide. Collectively, ICFAI Group alumni contribute significantly to the growth story of India.

*I would like to thank our dedicated Placement cell of the University that focuses on preparing each and every candidate who opt for placement. I am highly benefited by practice modules given to me during pre-placement training sessions.*

*The experts trained us company /sector wise to get through the interviews. The placement Cell structures the training modules by focusing on each and every student, understanding their area of improvements and areas of interest to make them job fit.*

*I got wonderful internship opportunity which helped me to understand the professional work dynamics and take my learning from academic institution to industry. I personally feel that the teaching of this university always strives to make the students capable and skilled. The latest curriculum and pedagogy adopted enables the graduating students to be more likely to take risks, make decisions and own the work.*

*I extend my sincere gratitude to the training team and dedicated faculty for showing me the path to opt for a bright career. What I am today is because of the counseling and training session which has brought a sea change into my personality. The university provided up to -date training modules to train the students starting from preliminary rounds, company briefings, expected questions on technology and tricks to handle stress-based interviews etc. The case-based preparation was really apt mode, which was also part of my final interview with the company. The regular industry talk series organized by the university is not only interesting but also update us with useful information. The teachers who are not only experts in their field but they are also real motivators for us. It is because of the focused preparation as per industry needs that today the best companies are looking for ICFAIians to join them which really make us proud to be associated with such a reputed Institution. I believe that the active participation of our juniors in the training session conducted by the university will surely help them to achieve their dreams and grab a good job with smart packages.*
