Set Goals

Do not pray for an easy life, pray for the strength to endure a difficult one.

Bruce Lee set the goal in 1969.

I, Bruce Lee, will be the first highest paid Oriental super star in the United States. In return I will give the most exciting performances and render the best of quality in the capacity of an actor. Starting 1970. I will achieve world fame and from then onward till the end of 1980 I will have in my possession \$10,000,000. I will live the way I please and achieve inner harmony and happiness. He passed away four years later. But by then, he had already accomplished his goal. His net worth was 10 Billion.

Airlines In Hiring Mode, to Expand Fleet and Network

IndiGo hiring across functions; Vistara looking to fill select posts, replace voluntary exits

Anirban Chowdhury
@timesgroup.com

Mumbai: In a semblance of recovery in India's aviation industry, some airlines have begun hiring as they expand fleet and network curtailed during the first few months of the pandemic.

Full-service carrier Vistara has hired more than 50 operational staff incrementally over the last few months as it has added five aircraft to its fleet, said an industry executive. IndiGo, too, is hiring across all functions. Growth in demand, which has picked up pace in the last few months will, however, be sluggish in the coming months, especially due to a spurt in Covid-19 cases and fresh rules of testing flyers for coronavirus as mandated by state governments. That will rein in expansion and hiring, said airline executives.

"While we have been taking measured steps towards growing our operations, we have also been hiring very selectively to address specific business requirements," said a spokesperson at Vistara. "These have been mainly for select operational roles, replacements of voluntary exits, and strategic needs, etc. We plan to continue to invest in people resources in line with our expansion plans."

A Ray of Hope

Vistara has hired more than 50 operational staff

Aviation industry lost over **39,000 jobs** in the April-September period last year

IndiGo is trying to get closer to its pre-Covid staff count

GoAir has invited applications for type rated pilots for our fleet

The spokesperson said that while the domestic market has been gradually moving towards the pre-Covid levels, the airline got the opportunity to launch operations to six new international destinations under India's travel bubble agreements with different countries. "In a span of a few months, we launched Dhaka, Doha, London, Frankfurt, Sharjah and Male. We also inducted two new Boeing 787-9 Dreamliners, two Airbus A321neo and four Airbus A320neo aircraft to our fleet in the calendar year 2020," the spokesperson said.

IndiGo is trying to get closer to its pre-Covid staff count. "We started our gradual rehiring process in December 2020 and are now hiring across most functions at IndiGo and Agile (the airline's airport services subsidiary)," said IndiGo's head of HR, Raj Raghavan. "We are excited to get some of our old colleagues back in our fold, wherever feasible, in this process of rehiring."

GoAir, another budget carrier, is hiring, too. A spokesperson for the airline said, "GoAir is continuously in the process of ramping up operations and has been adding capacity month-on-month. In this process we have identified requirements to cater to the increased operations. We have invited applications for type rated pilots for our fleet. We have over 4,100 employees who are actively engaged for operations. That number is expected to rise with increase in operations."

With the increase in the domestic airlines capacity to 80% of pre-Covid levels in December 2020, from 33% in May 2020, the recovery in the domestic air traffic has been gradual, reaching 73% of previous year level in January this year, ICRA said in a note on Monday.

EMBRACING THE FUTURE

novel technology with multifaceted benefits and opportunities, blockchain is revolutionising the financial sector

Bijin.Jose@timesgroup.com

Blockchain technology and cryptocurrencies have dominated the conversations among governments, policymakers, and analysts worldwide. While several nations are embracing it, some are still debating over its regulation, the awareness about the merits of this innovative and novel technology with its reaching outcomes in terms of governance and wealth maximisation, seem all the more vital now.

A few decades ago, following the advent of the internet, a similar phenomenon was witnessed around its regulation. It too was seen as a new way to deal with a set of modern problems. Regardless of the initial hesitation, the world went on to embrace it. Today, experts around the world are optimistic when it comes to the blockchain as they believe that this technology will tremendously impact how the world operates. This decentralised technology is rapidly

evolving and changing the way people transact. US, Germany, Japan, Canada, France, etc. have already embraced cryptocurrency and are working on various blockchain-based solutions.

Most of these nations underwent a similar trajectory when it came to introducing regulations. The US too was no exception with a similar situation where they had mulled banning and embracing cryptocurrencies. However, they have gone on to embrace it in a big way.

DECENTRALISED TECHNOLOGY

Experts and investors unanimously agree that the decentralised open protocols are one of the most striking facets of blockchain technology. They are widely available to anyone with an internet connection anywhere in the world. No matter what geography or cultural set up, users can affect power and impact similar to that of large financial institutions. This disruptive technology is here to simply assist governments and establishments in building better systems to serve the people better.

Decentralised open protocols, in terms of Bitcoins, are a protocol where the client and host nodes combine to create a general network. This combination of host

20th According to statistics, the global blockchain market is expected to be worth USD 20 billion in the year 2024

GREEN TECH REVOLUTION

India has been using green technology and smart infrastructure to enhance the quality of life and offer sustainable solutions

Bijin.Jose@timesgroup.com

In the last two decades, nations have increasingly emphasised the need for green technology. This has been mainly intended to slow down global warming and reduce the greenhouse effect. Green technologies, smart infrastructure, and sustainable solutions have gained prominence over time. Green technology is essentially an environment-friendly tech that does not disturb the environment nor cause lasting damage to natural resources.

This new mode of technology extends a wide variety of innovations and initiatives around the world. According to scientists and experts, green technology is in a way a channel to reconcile the human damage done to the environment for years. Most of these damages have been done by overexploitation of resources, excess use of chemicals, disrupting the ecological balance. Green technologies intend to reduce the harming effect and invent safe and sustainable ways of working.

Since the energy needs of humans are constantly growing, there is a desperate need to obtain clean energy sources. With the rapid pace at which the planet's natural resources are depleting, the need for technology that

As many as 31 per cent of India's population live in cities and contribute 63 per cent of the GDP. Urban areas are expected to house 40 per cent of the population and contribute 75 per cent of GDP by 2030. Green technology is a step in the right direction

TOWARDS SMART FUTURE

Overpopulation in many cities worldwide is leading to an acute shortage of resources as well as their over-exploitation. This has led to social and economic imbalance, adding more to the overburdened ecology. With the advancement of technologies, many nations are experimenting with Artificial Intelligence, the Internet of Things, to plan and design cities that can be called 'Smart Cities'. These smart cities are being developed to tackle critical social, economic, and environmental issues that are concerning many cities worldwide.

Smart city projects require huge investments and scientific temperance. Technology and its conscious implementation can reap high dividends in the future. These smart infrastructures are being developed to make optimal use of space and resources. These tech-enabled cities also aim at increasing communication and connectivity at various levels among citizens. The connectivity also extends to between citizens and administrations. There are concerted efforts to enhance the quality of public properties like schools, hospitals, and roads, etc. Through the use of advanced technologies, administrators can save time and money, as well as offer highly efficient services to the populace.

and establish collaborations at the IMC India Calling 2021," says Rajiv Podar, president, IMC Chamber of Commerce and Industry.

At present, India is witnessing tremendous growth potential in green technologies in terms of sustainability and mobility and smart infrastructure. Considering the rapid urbanisation, there is also an increasing need for sustainable mobility, mainly offering environment-friendly, automated, integrated, and personalised travel on demand.

When it comes to mobility, the world has been witnessing trends like electrification, shared mobility, and autonomy. Numerous cities around the world have introduced and are working on advanced technologies like intelligent transportation systems, robo-taxi, hyperloop, and traffic management systems. Since 2010, India's mobility industry has been witnessing change with the introduction of electric rickshaws. Today, the Indian automotive industry is the world's fourth-largest in the world.

can reduce the burden on the environment and offer clean energy sources is much needed now than ever. Green technology has been able to provide such resources around the world. Perhaps, this is one of the main reasons that today many developed and developing nations are adopting green technologies.

GREEN TECH RISING

"Sustainability is the only way forward. Investments in India can play a big part in achieving what we see as the ultimate goal of a resilient, sustainable economy that maximises the quality of life for all so people can develop their full potential and lead productive, creative lives without sacrificing the environment. Be a part of India story in Green Technologies and Smart Infrastructure. Explore opportunities

 Avsar HR Services

The very thought of appearing for your first interview is enough to give those jitters. After all, this usually happens to be a fresher's first encounter with the professional world, and that can be overwhelming for many!

However, interviews are no rocket science and can be cracked with some wit and skill. In fact, interview skills are among the foremost things that even the smartest of job seekers need to be aware of.

Here are a few handy hiring tips for fresher that you should follow to shine through the recruitment process:

1. Keep your resume short and crisp'

It is a common misconception that longer, more detailed resumes make better impact on the interviewers. Especially as a fresher, candidates are often tempted to write long paragraphs in order to make it competitive.

However, no one has the time to go through long-winded essays to discern a candidate's potential. Highlight the skills that the respective job profile requires and get multiple versions of the resume ready.

2. Curate your online presence

Given how social media is steadily gaining momentum as one of the most effective channels for people to express their views in recent times, it is also emerging as a key factor for consideration during recruitment.

Hence, maintain your LinkedIn profile even if you do not have a prior work experience. It comes to your aid in more ways, as other companies will be able to find you for off-campus placements.

3. Research about the company

This is the most basic step which a candidate needs to take care of before walking into an interview. Even if you are among the most skilled candidates, knowing about the company will give you that extra edge over the rest.

You should explore and find out the basics like inception of the organization, its primary work, its market value etc. before appearing for an interview to get that brownie point!

4. Study the past trends

Numerous companies visit the campuses every year for various openings. While some companies hire only for selected roles, a lot of them hire in bulk.

Get in touch with your college's placement cell so as to get an idea of these trends and the competition you would be facing, and prepare yourself better for it.

5. Maintain a balanced attitude

Whether you are appearing for your first job or are a decade into your professional journey, always remember to strike a fine balance between professionalism, confidence, and modesty in your attitude while sitting for the interview.

For instance, usage of inappropriate slang words or any reference to race, religion, age, politics, or sexual orientation can prove to be fatal for the respective interview and your career ahead.

6. Don't be afraid of rejections

It is completely okay if you do not get selected in some of these interviews. Feeling low during such times is quite obvious, but tries not to take these rejections to your heart.

Remember that there are lots of other companies who will visit your campus and who you can even reach out to on your own (off-campus placements).

After all, you are just embarking on your professional journey and you have an entire life ahead of you!

Industry Overview

ENGINEERING AND CAPITAL GOODS INDUSTRY

India's engineering sector has witnessed a remarkable growth over the last few years driven by increased investment in infrastructure and industrial production. The engineering sector, being closely associated with the manufacturing and infrastructure sectors, is of strategic importance to India's economy.

India, on its quest to become a global superpower, has made significant stride towards developing its engineering sector. The Government has appointed Engineering Export Promotion Council (EEPC) as the apex body in charge of promotion of engineering goods, products, and services from India. India export transport equipment, capital goods, other machinery/equipment, and light engineering products such as castings, forgings, and fasteners to various countries of the world. The Indian semiconductor industry offers a high growth potential area as industries which source semiconductors as inputs are themselves witnessing high demand.

India became a permanent member of the Washington Accord (WA) in June 2014. The country is now a part of an exclusive group of 17 countries who are permanent signatories of the WA, an elite international agreement on engineering studies and mobility of engineers.

Market size

Turnover of the capital goods industry was estimated at US\$ 92.00 billion in 2019 and is forecast to reach US\$ 115.17 billion by 2025.

India exports engineering goods mostly to US and Europe, which account for over 60% of the total export. Engineering exports reached US\$ 75.90 billion in FY20 and reached US\$ 39.90 billion in FY21 (between April 2020 and October 2020). Index of industrial production (IIP) for electrical equipment industry stood at 105.5 in FY20.

Government Initiatives

The Indian engineering sector is of strategic importance to the economy owing to its intense integration with other industry segments. The sector has been de-licensed and enjoys 100% FDI. With the aim to boost the manufacturing sector, the Government has relaxed the excise duties on factory gate tax, capital goods, consumer durables and vehicles.

The Export Policy Uttar Pradesh 2020-25 for promoting export growth and competitiveness, providing export subsidiaries with the required export-related assistance and services and creating & improving technical and physical infrastructures to improve exports from state industries.

In November 2020, to strengthen the capital goods (CG) sector, the government has set up a 22-member interministerial committee through initiatives, which will help this sector to effectively contribute to the national target of achieving a US\$ 5 trillion economy and a US\$ 1 trillion manufacturing sector.

The Government announced Rs. 150,000 (US\$ 2,250) income tax deduction on interest paid on loans for purchase of electric vehicles the Union Budget 2019 20.

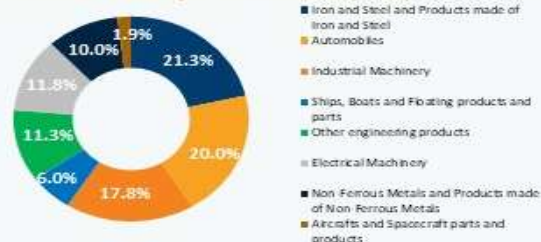

The Union Cabinet has approved incentives up to Rs. 10,000 crore (US\$ 1.47 billion) for investors by amending the M-SIPS scheme in order to further incentivise investment in electronics sector, create employment opportunities and reduce dependence on import by 2020.

Government approved the 'Production Incentive Scheme' (PLI) for large-scale electronics manufacturing.

IUJ Alumni Memoirs

A Golden Era

My most nostalgic moment, started just after the entry as I was able to gel with my friends easily, who became my lifelong friends. The faculties at the Institute were elite and I was overwhelmed attending their lectures. As I enrolled late, my biggest challenge was to cover-up the missing sessions. However, I went to some faculties to ask for personal classes and I got tremendous support from them.

Sumit Kumar Sahu
 (Entrepreneur)
 Company Name
 Shri Balajee Infratech

I learned from my faculties that challenges make a person stronger. I was facing many challenges in my tenure as a student but thanks to my teacher who always motivated and inspired me by saying that 'Life is a journey and it never stops; so go with it sometimes running, sometimes walking but always keep moving. So I set a goal and chase it and followed it till I reached my destination. I adhered to myself and faced everything with a brave heart. I boosted my self-confidence which helped me finally to be what I always wanted to be.

The thought of entrepreneurship was always there in my mind. And finally, the day came when I planned to start my own venture. The guidance of my teachers helped me to achieve my career goals and to confidently face the cut-throat competition of the market. Life goes on and we make memories day by day but these were some short and best nostalgic memories I had.

Alumni Meet Conducted at ICFAI University through video conferencing

RANCHI: ICFAI University, Jharkhand conducted its Alumni Meet -2021 at the University through Video Conferencing, wherein Alumni from various locations in India and abroad participated enthusiastically. Students of the University and faculty members also participated in the event.

Welcoming the Alumni, Prof O R S Rao, Vice-Chancellor of the ICFAI University, Jharkhand said, "We are proud of our Alumni, who have been working in senior roles in reputed organisations like Accenture, Amazon, Amul, BPL, CCL, Cognizant, Ernst and Young, Google, HDFC Bank, Hindustan Unilever, ITC, TCS, WIPRO etc. Association between the University and the Alumni can be leveraged in 3 ways - Professional development of the Alumni through professional networking and re-skilling, Enhancing Employability of our students through guest lectures, Internships etc and jointly taking up services for the benefit of the Society".

the alumni expressed their gratitude to the University and its faculty members for the quality of teaching and personal care that was taken by them, which laid the foundation and groomed even

average students into competent professionals. Panel discussions were held on areas of collaboration, which included Industry-Academia Partnership, Internships, Placements and Social Outreach.

Senior faculty members, who included Dr Pribha Chaturvedi, Dr Runma Bhattacharyya, Dr Bijay Ganguly and Dr Abhay Sinha co-ordinated the event. Ms Aarti Kumari (BCA Student) anchored the event.

Proposing a Vote of Thanks, Prof Arvind Kumar, Registrar of the University, highlighted the need for strengthening the interaction between the alumni and the University on a sustained basis.

About i-Nowkri

"A Step towards Career Design and Job Placement Support"
 Amid an increasingly demanding economic and business climate, job placement support has become an important duty for universities. ICFAI University, Jharkhand makes efforts toward career design and job placement support from the early stages of students' education, based on a clear understanding of the types of job candidates who are sought by employers, and who are in step with times. The university provides students with the information needed in the search for employment, internship opportunities including company profiles, job listings all of which can be used for researching prospective employers, ready to move ahead professionally.....

About ICFAI University Jharkhand

ICFAI University, Jharkhand is part of the ICFAI Group, known for its quality of education and ethics. The University was established as per the Jharkhand Government Act and the University is empowered to award degrees, as per Sec 22 of UGC Act, 1956. The University is committed to develop a new cadre of professionals, with a high level of competence and deep sense of ethics and commitment to the code of professional conduct. The ICFAI University, Jharkhand has undertaken the challenge of moulding students with different backgrounds by providing them Quality Higher Education, which includes not only sound knowledge of the subject but also hands-on professional skills and soft skills, so as to make them not merely employable but successful in their careers. At the same time, Job Market, particularly for fresh graduates has been undergoing a paradigm shift, in terms of the profiles of the Recruiting Companies as well as the Roles. It is in this context that the University felt the need to communicate to the students on a continuous basis, the changing trends in the Job Market and prepare the students accordingly. i-Nowkri News Letter is intended to fulfill the need by way of sharing the Job Market trends, Information on Campus Placements as well as Off-Campus placement opportunities (both in Private and Government Sectors) and advice to the students on how to prepare themselves to face the entire selection process. Besides, it serves as a communication channel for experience sharing by the students that successfully cracked the placement interviews.
